

## Personal Statement

"I have over twenty years of demonstrated Information Technology experience, working as a software and web developer for a diverse group of clients and industries."

## Work Experience

### IT Contractor

Hooksett, NH

- Working as a web contractor while looking for full time employment. This includes ASP and PHP projects on Microsoft and Apache Servers using MS and MySQL databases.
- Certified Web Developer for Upwork (oDesk, Elance), and Guru online freelance communities.

### Web Developer

June 2016-Present

### Rivier University

Nashua, NH

- Recreated the University's public website from design to implementation. This included a new responsive design, DB conversion, upgrading and proper utilization of CMS controls and API's. Improvement to university forms, portals, feeds, user permission and all other aspect for their website. Also worked on new wide screen mobile first website redesign.
- Responsible for ongoing website projects, work requests, upgrades and improvements.
- Support marketing with Google Analytics setup, reports, remarketing, and tracking as well as email, AdWords, Facebook and other ongoing marketing campaigns.

### Web Developer

June 2013 - June 2016

### Ektron, Incorporated

Nashua, NH

- Working as an Ektron Application Engineer I was part of teams which developed numerous corporate websites using the core technologies of the .NET framework. These sites used both my OOP skills, along with my Web based development skill set. This includes C#, VB, SQL, XML and HTML.
- Excellent knowledge of the Ektron CMS product line using the majority of the features and functions within Ektron's CMS400.
- The ability to integrate my past project leadership and consulting skills in the research and discovery phases with potential customers, as well as defining business requirements and analysis for existing Ektron projects.

### Application Engineer

Nov 2006 - Jan 2013

### Software Continuum, Incorporated

Manchester, NH - San Diego, CA

- Extensive experience as a Senior IBM Consultant in all facets of software design and development, encompassing skills and responsibilities for full SDLC, programming, configuration and troubleshooting, in addition to substantial involvement in team, project, and client support functions.
- A diverse background with a wide range of software applications, packages, and tools.
- All projects were performed using the IBM AS/400 and some form of RPG programming. Most projects require some level of design and project management.

### Senior Consultant IBM

1990 - 2006
